Vote of thanks	: J S Devadersana (II BSc Student)
Time	: 10.30 am
Technical Session	: Training on soap making
Resource Person	: Murukan B

Dear teachers,

We are living in a dangerously lethal and potent world amidst pollution, pandemic and anxiety, for the all the things uncertain. Our appearance, our thought systems, our body and even our personality is hampered with toxicity and artificial/synthetic agents through air, water, food, clothes, cosmetics, etc. As such we are bound to use environment friendly and toxin free products at little or no expense that requires our patience and an earnest desire to live a chemical free life, closer to nature. At this juncture, **The Department of Chemistry** in association with **Naipunya 2021**, (a **Skill Development Programme**, launched in the month of August 2021 as part of World Youth Skill Day) by **IQAC, VTM NSS College, Dhanuvachapuram**, is organising an **Additional Skill Development Programme in Soap Making** for our faculty members to enjoy the perks of an environment friendly, cost-effective and healthy skin. The **one day programme** aims to provide a sustainable, natural and efficacious method to develop home-made soaps and impart the newly acquired skills to our learners so that they can develop a sense of responsibility towards nature and support themselves through entrepreneurship.

### **Organising Committee:**

Dr. V M Anandakumar (Principal), Ms Shama Pillai (IQAC Convener), Ms Sreeja T G (HoD & Convener), Dr Suprabha S, Dr Nitha L P (Programme Coordinator), Ms Manju M J, Dr Lakshmi C S Nair
